

Summer 2017 Marine Technology Camps

The Marine Technology Society (MTS) is pleased to partner with Northwestern Michigan College and Rutgers University to offer two camp experiences for undergraduate students during the summer of 2017.

This is an exciting opportunity for undergraduate students with little to no experience using marine technologies as part of their courses or laboratories. The Marine Technology Camps are designed to offer students a chance to not only learn about several technologies, but to deploy the equipment to gather data applied to various investigations.

Opportunity runs deep™

**Northwestern
Michigan
College**

Marine Technology Camp - Traverse City, MI May 21 – 27, 2017

Please join us for a week-long, hands-on experience using several marine technologies. Participants will log time on research vessels, collect data using ROVs, sonar, sensors and buoys and learn about the multiple applications of these technologies.

Please visit the camp web site for more information:
