

CALL FOR PAPERS

ADVANCING OIL SPILL TECHNOLOGY: BEYOND THE HORIZON NOVEMBER/DECEMBER 2018 ISSUE

Since 2011, the Gulf of Mexico Research Initiative (GoMRI) has enabled the investigation of the effects of oil spills on the environment and public health. The investigations yielded research results and technological advancements that will improve future studies and impact models.

The February 2018 TechSurge brought together the GoMRI and MTS communities to share research results and discuss how the two communities might work together to better prepare for future events.

The main topic areas covered by the TechSurge included:

- Modeling and Prediction
- Technologies for Detection
- Mitigation
- Ecosystem Health

This special edition of the *MTS Journal* will capture the science, engineering and technologies presented during the TechSurge, and this call for papers welcomes contributors unable to attend the meeting with applicable information for the GoMRI and MTS communities.

The *Marine Technology Society Journal* is the flagship publication of the Marine Technology Society. It publishes the highest caliber, peer-reviewed papers on subjects of interest to the society: marine technology, ocean science, marine policy, and education.
