or download the [order form](#) and fax to (410) 884-9060.
Shipping not included in price.

Full implementation of IOOS is critically important for economic development, public health and safety, and managing marine ecosystems. These special issues bring together reports on the benefits of the U.S. Integrated Ocean Observing System and other observing systems around the world. They include current research and developments, as well as commentaries describing the state of the art in ocean observing.

Guest Editors:

Zdenka Willis, Director IOOS Program, NOAA
Justin Manley, Director Scientific Business, Liquid Robotics, Inc.

PART 1 - TABLE OF CONTENTS

Commentaries

Ocean Observations: Essential for Good Stewardship

Dr. Jane Lubchenco, Administrator, NOAA

Tracking Coastal Vital Signs: Now Is the Time to Ensure the U.S. Has the Coastal Observing Capacity for Responding to Emergencies and for Day-to-Day Operations

Josie Quintrell, National Federation of Regional Associations for Coastal and Ocean Observing

USGS Perspectives on an Integrated Approach to Watershed and Coastal Management

Matthew Larsen et al., USGS

Happy Days

Paul Gaffney II, Vice Admiral, U.S. Navy (Ret.)

Knowledge is Good
Dana Goward, USCG

Integrated Ocean Observing and the U.S. Navy
Rear Adm. Dave Titley, Oceanographer of the Navy

Ocean Observatories Initiative (OOI): Advanced Research Tools for the Ocean Sciences
Timothy Killeen, National Science Foundation

Papers

The U.S. Integrated Ocean Observing System in a Global Context
Ralph Rayner

Integrated Ocean Observing System in Support of Forecasting Harmful Algal Blooms
Ann Jochens et al.

Operation and Application of a Regional High Frequency Radar Network in the Mid-Atlantic Bight
Hugh Roarty et al.

Australia's Integrated Marine Observing System – Delivering Datastreams to Address National and International Priorities in Marine and Climate Research
Katy Hill et al.

IOOS Supports Marine Operations Across the Ocean Observing Regions
Julie Thomas

The IOOS-Industry Relationship: From Strong to Stronger
Darrell Duncan et al.

The Importance of Coastal Observations to Regional Activities of the U.S. Army Corps of Engineers
William Birkemeier et al.

Developing an Education and Outreach Program for the U.S. IOOS: Eyes on the Ocean, Hands-On Learning
Chris Simoniello et al.

Implementing the National Integrated Ocean Observing System (IOOS) - From the Federal Agency Perspective
Robert Bassett et al.

The IOOS High Frequency Radar Network: Status and Local, Regional and National Applications
Jack Harlan et al.

Integrated Ocean Observing System (IOOS) Supports Marine Operations — A Look from the U.S. Coast Guard
Jon Berkson et al.

Working in Freshwater: The Great Lakes Observing System Contributions to Regional and National Observations, Data Infrastructure and Decision-Support
Jennifer Read et al.

Building the IOOS Data Management Subsystem

Jeff de La Beaujardiere

The Ocean Observatories Initiative: Sustained Ocean Observing Across a Range of Spatial Scales

Tim Cowles et al.

PART 2 - PAPERS (Tentative)

Identifying Benefits and Costs of an Alaska Ocean Observing System

Steve Colt et al.

Interdisciplinary Ocean Observing on the Texas Coast

Ruth Mullins et al.

Water Quality Success Stories: Integrated Assessments from the IOOS Regional Associations and National Water Quality Monitoring Network

Rob Ragsdale et al.

Alliance for Coastal Technologies: Advancing Moored pCO₂ Instruments in Coastal Waters

Mario Tamburri et al.

The Global Ocean Observing Component of IOOS: Implementation of the Initial Global Ocean Observing System for Climate and the Path Forward

Joel Levy et al.

Contributions of the U.S. Integrated Ocean Observing System to National and Regional Coastal Hazards Information, Tools and Services

Chris Ostrander et al.

United States Integrated Ocean Observing System and the Shellfish Growers Partnership

Carl Gouldman et al.

The Trans-Atlantic Slocum Glider Expeditions: A Catalyst for Undergraduate Participation in Ocean Science and Technology

Scott Glenn et al.

Advances in the Ocean Observing System in the Gulf of Maine: Technical Capabilities and Scientific Results

Neil Pettigrew et al.

The EventViewer: A Tool for Visualizing and Exploring Events Extracted from Ocean Observing System Data

Kate Beard et al.
