

CALL FOR PAPERS

Lakebed 2030: A Comprehensive Great Lakes Mapping Approach

May/June 2020 issue

Lakebed 2030 will bring together the science and research, academia, policy, government, and business/industry communities in support of identifying existing and prioritizing needs in Great Lakes mapping and observation data.

The October 1–2, 2019 Lakebed 2030 TechSurge event, held in Traverse City, Michigan, aimed to:

- Develop a strategy to catalog new and existing lakebed information for shared use and understanding.
- Engage the Great Lakes community with the newest technology advancements in support of mapping and observation.
- Advance opportunity for technology business and technology development in Great Lakes region in support of mapping and observation in the Great Lakes region.

This special edition of the *MTS Journal* will capture the science, engineering, and technologies presented during the TechSurge, and this call for papers welcomes contributors unable to attend the meeting with applicable information for the Great Lakes and MTS communities.

The *Marine Technology Society Journal* is the flagship publication of the Marine Technology Society. It publishes the highest caliber, peer-reviewed papers on subjects of interest to the society: marine technology, ocean science, marine policy, and education.
